Experience

Since 2016: Head of Academic Libraries IT Services at Pau's University, France.

Web Development:

- ISTEX-UPPA : a search engine that allows exploration of 27 million scientific references acquired as part of the ISTEX program.

- SISE Analytics : a decision support tool that processes and presents enrollment statistics from the Ministry of Higher Education and Research.

- Docelec Snitch : n automatic monitoring tool that detects problems accessing the university's 80 documentary databases, generates a report, and sends notifications by email.

- Déproxificateur : a web scraper that provides access to electronic documentation for external readers of university libraries.

- UPPA anti-phishing : a Chrome/Firefox browser extension designed to protect university email users from certain recurring phishing emails.

- Resa-SCD : a library seat, rooms and resources booking application.

- Quitus-SCD : an automated issuance of official administrative documents for UPPA students.

Academic Projects :

- Board.lease : MVP of a mobile website for renting surfboards between individuals developed in 10 days.
